Presentation Goals

This presentation is designed to introduce the option of using openly licensed work in teaching and learning resources produced by those at the University of Michigan and elsewhere.

Participants should be able to:

- Recognize copyrighted material in learning resources
- Understand what Open Educational Resources are
- Understand how OER fits into the Learning Objects and MERLOT framework
- Find and use openly licensed material in learning resources
- Clear and publish resources at Open Educational Resources

Open Educational Resources

Open Educational Resources (OER) are learning materials that are **available for free and openly licensed to be used, adapted and redistributed** in local contexts.

OER includes syllabi, lecture slides, assignments, academic image libraries, instructional videos and comprehensive, integrated electronic mini-courses. They are referred to as open educational resources because they are designed for teaching and learning and do not have to be associated with a specific course.

The screenshot shows the open.michigan website interface. At the top, there is a navigation bar with the logo 'open.michigan' and social media icons for Twitter, Facebook, YouTube, and a search bar. Below the navigation bar, there are links for 'home', 'find', 'share', 'connect', 'about', and 'contact'. The main content area features a sidebar with a list of categories: literature, science and the arts; architecture + urban planning; dentistry; education; engineering; information; medical; nursing; public health; public policy; social work; and um-flint. The main content area has a heading 'Find U-M Open Educational Resources' and a sub-heading 'Find stuff and use it. Freely. Welcome to our collection of openly licensed educational resources (OER) from the University of Michigan. Ranging from course materials to videos to software tools to student work—this content is ready for downloading and remixing.' Below this is a link 'List of all Schools, Colleges, & Units >>' and a search bar. There is also a 'Featured Resources' section with a link to 'The Components of the Social History' and a small image of a stethoscope.

Source: <http://open.umich.edu/education>

There are two principles on which Open.Michigan is founded:

1) Public universities have a **responsibility to share** the knowledge and resources they create with the public they serve.

2) We are dedicated to **increasing knowledge dissemination** across the higher education community through **encouraging a culture of sharing**.

This slide is inserted as the first slide/page of all published materials.

Use + Share + Adapt

{ Content the copyright holder, author, or law permits you to use, share and adapt. }

Public Domain – Government: Works that are produced by the U.S. Government. (USC 17 § 105)

Public Domain – Expired: Works that are no longer protected due to an expired copyright term.

Public Domain – Self Dedicated: Works that a copyright holder has dedicated to the public domain.

Creative Commons – Zero Waiver

Creative Commons – Attribution License

Creative Commons – Attribution Share Alike License

Creative Commons – Attribution Noncommercial License

Creative Commons – Attribution Noncommercial Share Alike License

GNU – Free Documentation License

This slide is inserted as the second slide/page of all published materials. This shows Open.Michigan's analysis of the content objects in the material. Knowing this may assist downstream users (especially those in other countries) in how they can and cannot use a particular object within the resource.

Make Your Own Assessment

{ Content Open.Michigan believes can be used, shared, and adapted because it is ineligible for copyright. }

Public Domain – Ineligible: Works that are ineligible for copyright protection in the U.S. (USC 17 § 102(b)) *laws in your jurisdiction may differ

{ Content Open.Michigan has used under a Fair Use determination. }

Fair Use: Use of works that is determined to be Fair consistent with the U.S. Copyright Act. (USC 17 § 107) *laws in your jurisdiction may differ

Our determination **DOES NOT** mean that all uses of this 3rd-party content are Fair Uses and we **DO NOT** guarantee that your use of the content is Fair.

To use this content you should **do your own independent analysis** to determine whether or not your use will be Fair.

The difference between LOs and OER

OA: Open Access

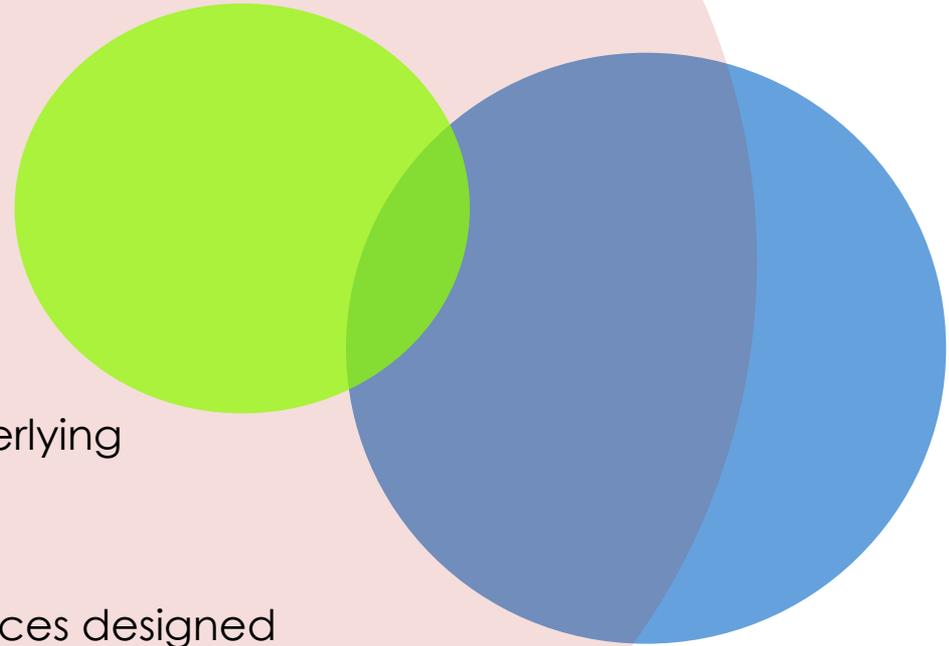

LOs: Learning Objects

OER: Open Educational Resources

OA focuses on sharing content, but no underlying licensing requirement.

Learning Objects are interactive web resources designed to support a learning objective and include such things as animations, simulations, tutorials, case studies and games.

OER includes any educational content that is shared under an open license, whether or not it is a part of a course.

2.0 Acceptable Use

MERLOT is a free and open resource designed primarily for faculty and students of higher education. MERLOT is built on the collaboration of its partners, community members, registered members, and users. In that spirit, **MERLOT allows access to its site and the materials therein for personal and non-commercial uses as set forth in this policy.** Links to online learning materials are catalogued in MERLOT, along with other items such as peer reviews and assignments. MERLOT is committed to improving the effectiveness of teaching and learning by expanding access to high quality teaching and learning materials that can be easily incorporated into faculty-designed courses.

By using MERLOT, you agree to the terms of MERLOT'S AUP and promise to **use any content found on the MERLOT website, whether in whole or in part, for personal, non-commercial, and educational purposes** only as described in this policy. You also agree to comply with prevailing United States laws regarding copyright and the Digital Millennium Copyright Act of 1998.

Find an example of an openly licensed Learning Object in MERLOT that is in your discipline. Add it to your collection.

Copyright Basics

Copyright is a form of protection provided by the laws of the United States (title 17, U.S. Code) to the authors of “original works of authorship,” including literary, dramatic, musical, artistic, and certain other **intellectual works**. This protection is available to both published and unpublished works.

Copyright
United States Copyright Office

Copyright Basics

What is Copyright?

Copyright is a form of protection provided by the laws of the United States (title 17, *U.S. Code*) to the authors of “original works of authorship” including literary, dramatic, musical, artistic, and certain other intellectual works. This protection is available to both published and unpublished works. Section 106 of the 1976 Copyright Act generally gives the owner of copyright the exclusive right to do and to authorize others to do the following:

- To reproduce the work in copies or phonorecords;
- To prepare derivative works based upon the work;
- To distribute copies or phonorecords of the work to the public by sale or other transfer of ownership, or by rental, lease, or lending;
- To perform the work publicly, in the case of literary, musical, dramatic, and choreographic works, pantomimes, and motion pictures and other audiovisual works;
- To display the work publicly, in the case of literary, musical, dramatic, and choreographic works, pantomimes, and pictorial, graphic, or sculptural works, including the individual images of a motion picture or other audiovisual work; and
- In the case of sound recordings,* to perform the work publicly by means of a digital audio transmission.

In addition, certain authors of works of visual art have the rights of attribution and integrity as described in section 106A of the 1976 Copyright Act. For further information, see Circular 40, *Copyright Registration for Works of the Visual Arts*.

It is illegal for anyone to violate any of the rights provided by the copyright law to the owner of copyright. These rights, however, are not unlimited in scope. Sections 107 through 121 of the 1976 Copyright Act establish limitations on these rights. In some cases, these limitations are specified exemptions from

<http://www.copyright.gov/circs/circ1.pdf>

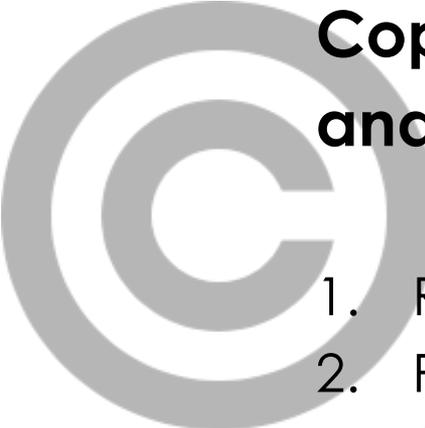

Copyright: All Rights Reserved

Copyright covers:

- Maps
- Dramatic works
- Paintings
- Photographs
- Sound recordings
- Motion pictures
- Computer programs
- and more...

It is designed to protect the **expression** of ideas but not the ideas themselves, nor does it protect effort.

Visit U-M's Copyright Office in the Library or visit their website at <http://www.lib.umich.edu/copyright> for more information and resources on copyright at the University of Michigan.

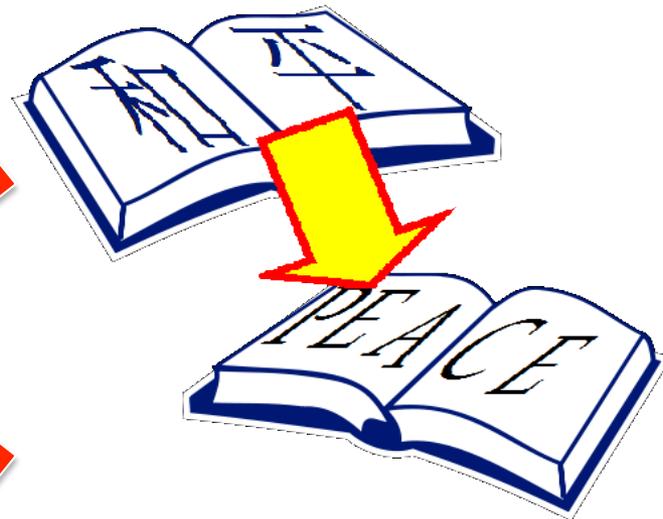

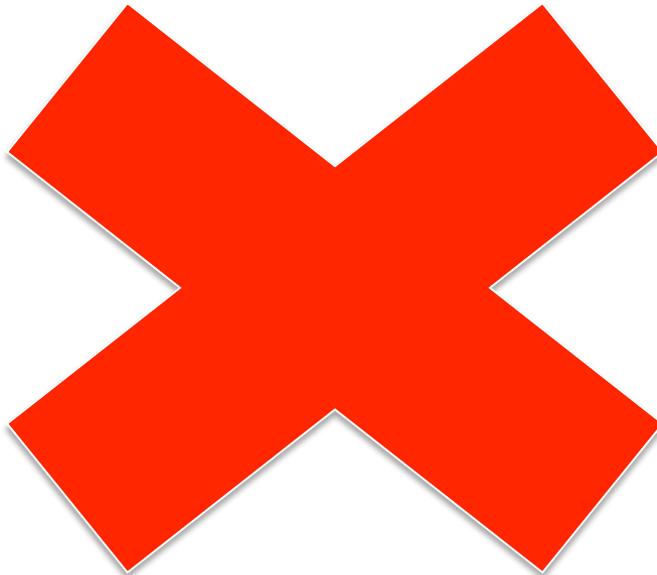

Copyright holders hold exclusive right to do and to authorize others to:

1. Reproduce the work in whole or in part
2. Prepare derivative works, such as translations, dramatizations, and musical arrangements
3. Distribute copies of the work by sale, gift, rental, or loan
4. Publicly perform the work
5. Publicly display the work

US Copyright Act of 1976, Section 106

Under © it is illegal to:

- Translate works (derivative)
- Use someone else's photo, slide, quote (without permission)
- Dramatize a work (derivative)
- Reproduce in whole or in part (without permission)
- Make copies of a work (distribution)

Teach Act, 2002

Goal: Address digital use of copyrighted materials in distance education settings.

“When educators use any of these works in their teaching, they are using copyright-protected materials. Among the rights of copyright owners are rights to make copies and rights to make public performances and public displays of the works. An assembled-or even dispersed-group of students may well constitute the “public” under the law. Consequently, **educators frequently incur possible violations of owners' rights whenever they copy materials as handouts, upload works to websites, “display” slides or other still images, or “perform” music, videos, and other works.**”

Responsibilities of Instructors:

- Performances of some (not dramatic) works
- Can't use commercial educational materials
- Supervision required
- Contextually relevant and integrated into curriculum
- [Fair use](#) still applies

Text: Quotes, Passages, Poems

“...performing certain functions to obtain the effective acquisition, function, allocating, and utilization of human efforts and physical resources for the purpose of accomplishing some goal.” – Daniel Wren, 1979

The Mesh

We have come to the cross-roads
And I must either leave or come with you.
I lingered over the choice
But in the darkness of my doubts
You lifted the lamp of love
And I saw in your face
The road that I should take.

- Kwesi Brew

Open Licenses: Some Rights Reserved

“The Creative Commons copyright licenses and tools forge a balance inside the traditional “all rights reserved” setting that copyright law creates. Our tools give everyone from individual creators to large companies and institutions a simple, standardized way to grant copyright permissions to their creative work.” – [Creative Commons](#) License page

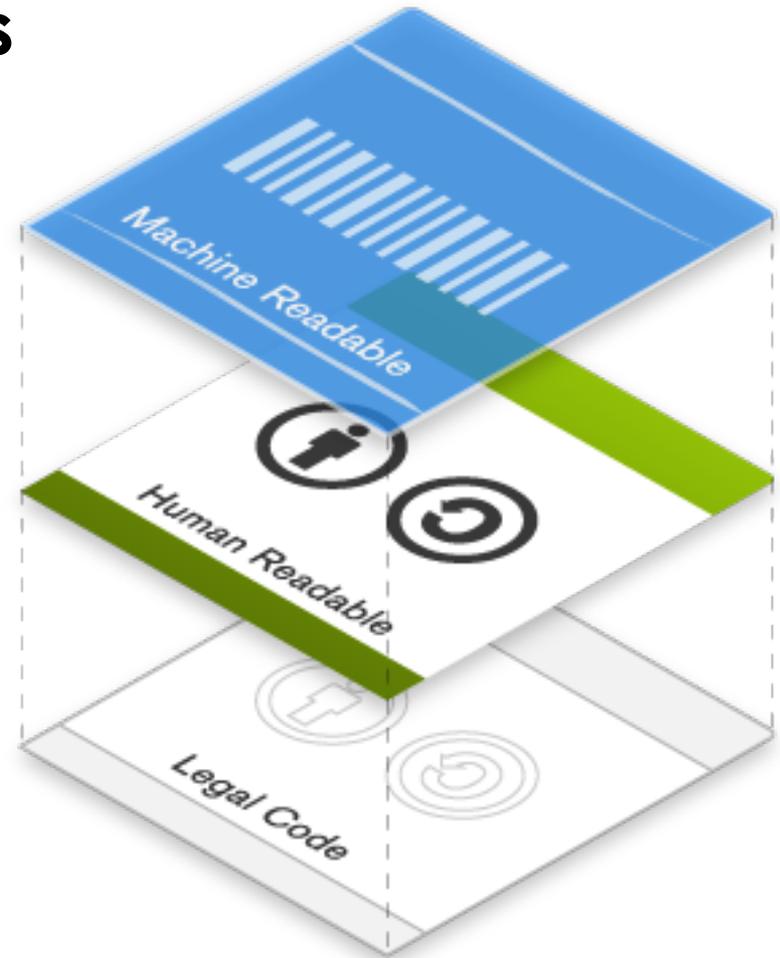

least restrictive

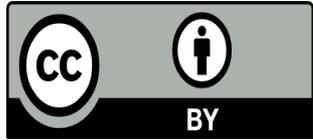

most restrictive

Open.Michigan applies only the first four (CC: BY, CC: BY-SA, CC: BY-NC, and CC: BY-NC-SA) licenses to our OER because these licenses allow for local adaptation of the resources by others.

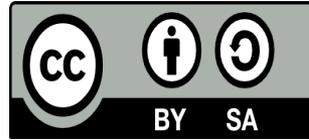

Creative Commons Licenses

- Machine Readable: CC Rights Expression Language (CC REL)
- Human Readable: Commons Deed
- Legal Code: Traditional Legal Tool

Credit you for the original creation.

Credit you **and license their new creations under the identical terms.**

Take a break!

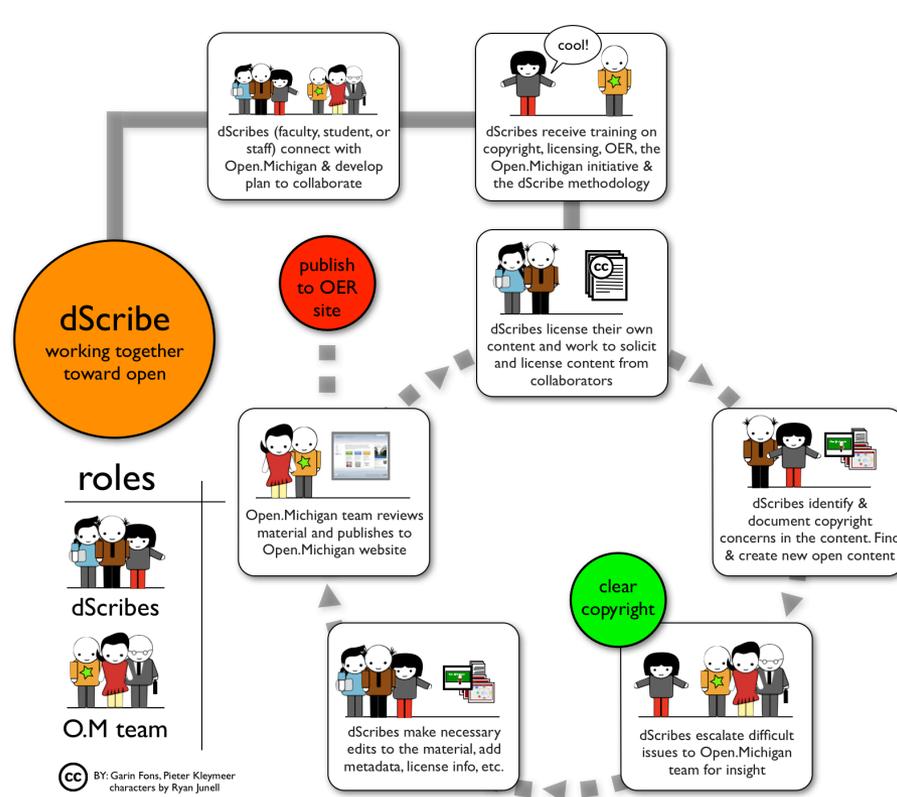

Doug McAbee "[Taking a break](#)"

Breakout Session Two:

Find an example of OER on the open web that can be used as an LO. What steps do you take to make it a Learning Object? How would you make sure you can use and adapt this material in different contexts?

Clearance Process

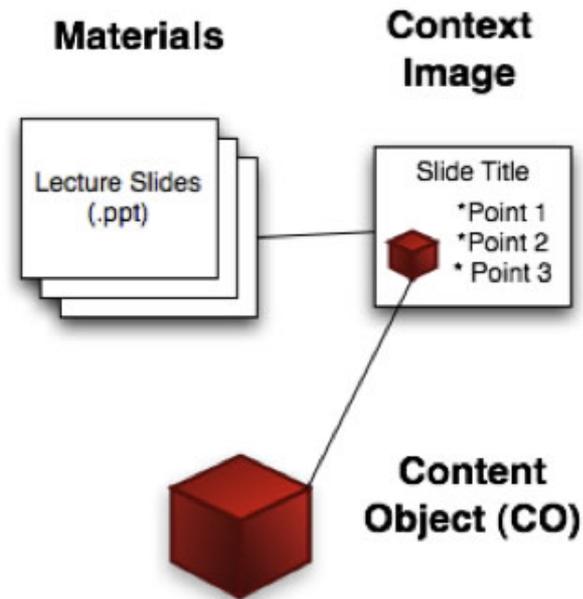

Faculty members working independently to clear their current (not new) learning materials of third party, copyrighted content can expect to spend a few hours of their time assessing and clearing this content. We also call this process “dScribe” and train volunteers to clear U-M content.

Assess and Clear

You must analyze the learning materials to determine if there are any objects that merit concern in regard to :

- Copyright
- Privacy
- Endorsement

Some Definitions

Learning materials include **lecture slides and other multimedia presentations, posters, handouts, readings, quizzes, class notes**, and a host of other associated educational material used for instruction and learning.

A **content object** refers to individual media items like **photos, illustrations, recordings, text, equations, screenshots, and other such media** that appear within learning materials.

Every content object has corresponding **context**, i.e. a single page or slide in a learning material, may contain one or more ‘content objects’ and surrounding text.

Assess and Clear

This is the heart of the clearance process. During this step, you will choose an action for each content object embedded in your learning materials:

- Retain
- Replace
- Remove and Annotate (If you feel the object in question cannot be legally used in your materials but you would like it to be accessible to future learners.)

Retain: Public Domain

Keep objects when it is clearly indicated or known that the content object is in the public domain. For example, a book published in the U.S. before 1923, such as Gray's Anatomy, is the public domain.

Relevant citation tags:

4th Amendment

- “The Right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches, and seizures, shall not be violated, and no warrants shall issue, but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.”

Retain: Permission

Recommend this action when you have been given expressed permission to use the object. This action is appropriate when the object is licensed under Creative Commons or the the object was created by someone else who gave special permission for it to be used.

- Relevant citation tags:

[CC: BY-SA](https://creativecommons.org/licenses/by-sa/4.0/), by [opensourceway](https://opensourceway.com/),
<http://www.flickr.com/photos/opensourceway/4371000710/in/set-72157623343017387/>

Retain: Copyright Analysis

Public Domain b/c Ineligible for © OR Fair Use Determination

Recommend this action when you come across an object for copyright status or permission is unknown, but you have reason to believe that it is legally acceptable to use it anyway. For example, if the object is something that is ineligible for copyright, e.g. a table of facts is not protected by copyright in the U.S., or it is a short excerpt of a much larger copyrighted work, then you would select this action.

Since the category of what's eligible for copyright, particularly in regard to data and scientific images differs across countries, OER producers should refrain from doing this sort of copyright analysis unless that have a deep understanding of copyright law in their country and/or are able to consult copyright attorneys trained in their jurisdiction.

Relevant citation tags:

Replace: Search

Recommend this action when it is easy search for Creative Commons (CC) or public domain replacements. One open search engines that Open.Michigan staff uses regularly is CC Search <http://search.creativecommons.org/>, which searches CC-licensed media on Wikimedia Commons (the media from Wikipedia), Flickr, and Google Images.

For more options see

https://open.umich.edu/wiki/Open_Content_Search

Tip: Find content with a Creative Commons license. [Learn more...](#)

Only search within **Creative Commons**-licensed content

Find content to use commercially

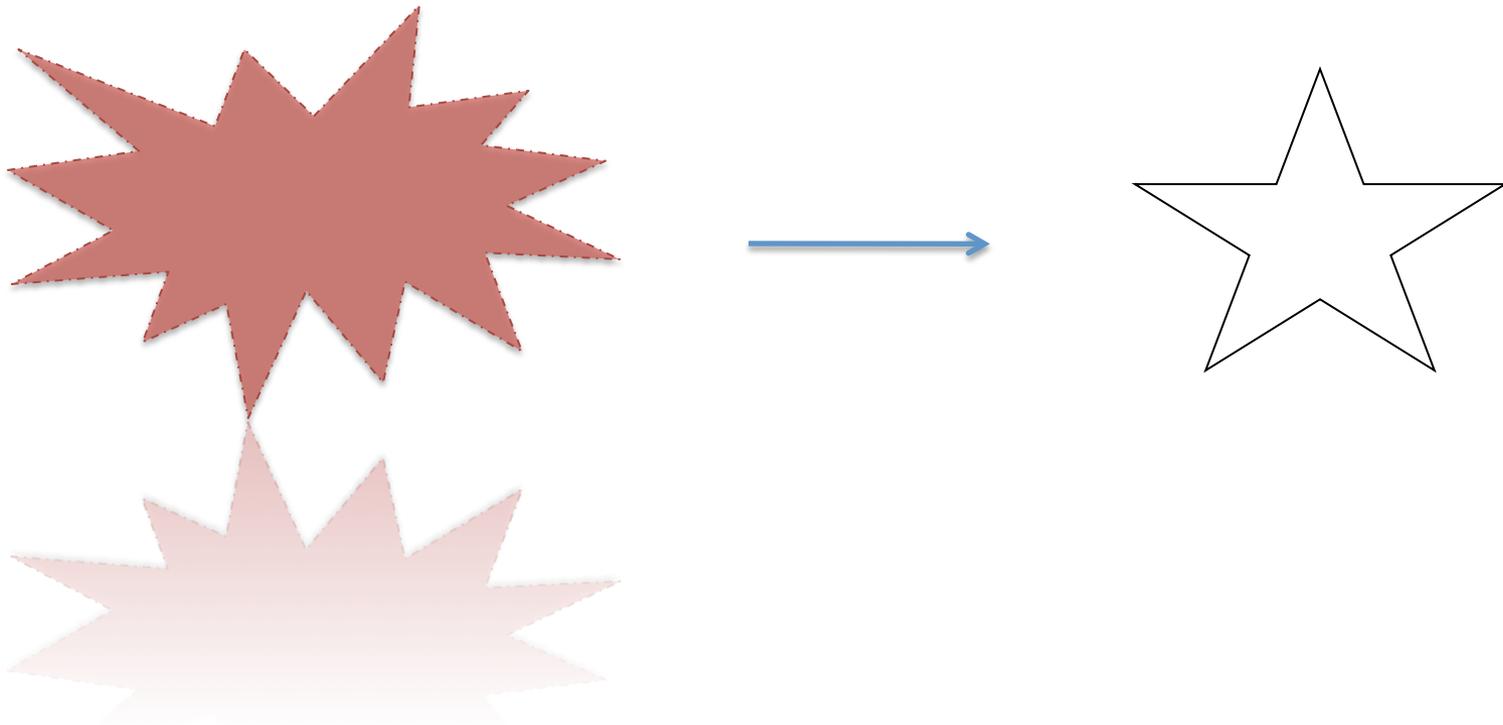

Find content to modify, adapt, or build upon

Or, return to the [basic search without all the knobs and twiddly bits.](#)

Source: <http://www.flickr.com/search/advanced/?>

Replace: Create

Recommend this action if you would like to create a content object with a **different expression but the same meaning** as the original copyrighted third party object.

Remove & Annotate

Chose this action when a content object is too difficult to replace or it is unnecessary. If the object is useful, then you can add an annotation which will lead the learner back to the copyrighted original, either by URL or bibliographic citation for print material.

Electronic Visualization Lab

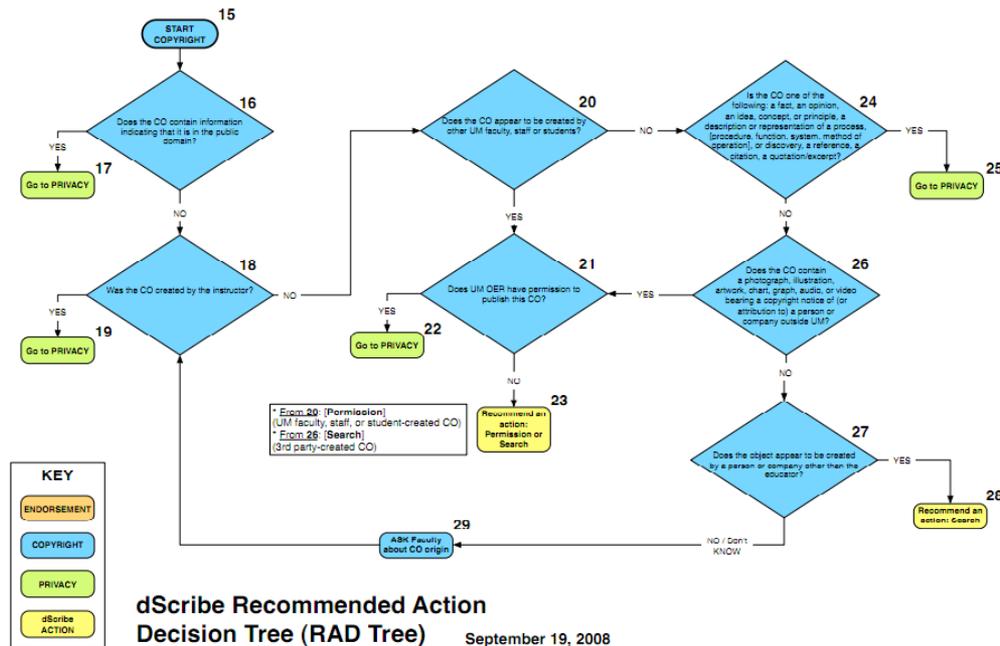

Removed
photographs of
the Lab.

Recommended Action Tree

In order to assist choices toward taking the appropriate action, the U-M OER team has developed a [workflow questionnaire](#) and a [casebook](#).

N.B. These resources were developed for U.S. law.

Edit Materials

To cite a CC Licensed object in your edited materials, you use the following:

1. Author
2. Source
3. License Abbreviation (e.g. CC BY)
4. License URL

See: [Disclaimer_Citation_Key](#) presentation for examples of how to cite materials.

Publish

When you license your resources you can publish them in different ways and in different places:

- Publish through Open.Michigan
 - Staff can review your content, package it and host it on our site: <http://open.umich.edu/education>
- Slideshare: <http://www.slideshare.net/>
 - Make sure you choose the open license you would like on your work when uploading content.
- Your own or your department or personal website. Open.Michigan can still direct traffic to your site from our educational resources page.

Take a break!

Doug McAbee "[Taking a break](#)"

Breakout Session Three:

Examine the LO you presented at the beginning of today's session. What steps would you take to publish this as an open educational resource?

We're here to help! If you have questions about this process or need clarification on this presentation, feel free to email us at open.michigan@umich.edu or visit our wiki for resources: <http://open.umich.edu/education>
